

Treat More Acres with Less Odor and Volatility Concerns

Freelexx[®]

HERBICIDE

Freelexx™ herbicide is revolutionizing the 2,4-D market by providing the performance and reliability you've come to depend upon with remarkably lower odor and volatility. Freelexx is built upon ground breaking 2,4-D choline technology and labeled for use on a broad range of use sites. Freelexx is a selective, post-emergent broadleaf weed herbicide offering reduced odor and volatility compared to other formulations. This novel 2,4-D technology provides vegetation managers with the flexibility to treat more acres with less concern for volatility and odor.

Noteworthy Features

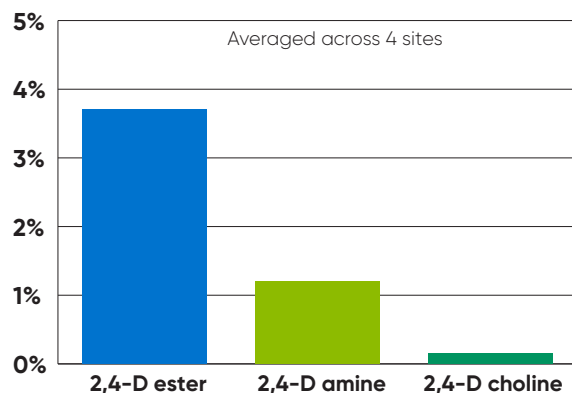

Breakthrough Formulation

- Reduced odor compared to other 2,4-D formulations
- Non-residual control of more than 100 broadleaf weeds and brush species
- Unique and innovative formulation technology resulting in reduced risk when working around sensitive areas or susceptible crops
- Labeled for use in noncropland, CRP, forests, pastures, rangeland, aquatic sites, and ornamental turf

Example of reduced volatility adjacent to sensitive crops
